Statement of Purpose

1. Please describe your career goals.

My goal is to always be open to learning new things in life even when I am at my best at work and to strive towards being the better version of myself everyday

2. Please describe the most significant challenge you have faced so far. How did you resolve it? What did you learn?

The most significant challenge I had to face was the transition I had to go through when I left my native to pursue my Bachelor's in Bangalore. It was very challenging as it was my first stint as a student outside my place which was my comfort zone. I had tough initial days adjusting to a new lifestyle but convinced myself with the fact why had come to that place in the beginning and worked hard the next years at my college

3. Please explain your objectives and goals as they relate to pursuing MBA. Also describe what you think other students may learn from you. (e.g. perspective, skills and expertise)

My main goal or aim is to put in my technical skills to use along with the things or skillset I build during MBA as I always believe that Management and technical skills form a major force that can be used well in several sectors
